

Beyond Teeth Whitening

Cosmetic tooth whitening is one of the fastest growing segments of the health and beauty industry, and the BEYOND™ Teeth Whitening System brings the latest in cosmetic tooth whitening technology to aesthetic professionals worldwide. In just one hour, clients receiving the Teeth Whitening treatment from their aesthetician can restore their white smile, removing years of stains.

The BEYOND™ Whitening Accelerator and the Teeth Whitening Treatment Packs deliver powerful whitening results to clients in simple, comfortable treatments - professional quality, Power Whitening treatments from the aesthetic professional. This is the future of cosmetic tooth whitening, and BEYOND™ Teeth Whitening makes it simple.

Frequently Asked Questions

We realize that you will have some questions about the BEYOND™ Teeth Whitening treatment. This is a list of our most frequently-asked questions. However, if you have anything else that you would like to ask us about, please feel free to contact us. We promise to reply to you promptly.

Is the BEYOND™ Teeth Whitening treatment for everyone?

The BEYOND™ Teeth Whitening treatment provides dramatic results for anyone who wants to whiten their teeth. This includes people with teeth that have been stained by smoking or by substances such as coffee or tea. It also whitens teeth stained by tetracycline, speckled by fluoride, or hereditary discoloration. Pregnant women or clients under 16 years of age should not receive the BEYOND™ Teeth Whitening treatment.

How white will my teeth get?

After undergoing whitening with the BEYOND™ Teeth Whitening System, teeth shades can brighten between five to 14 shades, with an average improvement of eight shades on the BEYOND™ Teeth Whitening Shade Guide. Although individual results will depend on how discolored the teeth were originally, the end result will be white, shiny teeth.

How long will the whitening last?

This varies from person to person and depends on your diet and lifestyle, but the effects usually last for about two years. Periodic touch-up treatments are recommended for clients who frequently consume coffee or other staining foods and drinks or for those that use tobacco products.

Is it safe?

Yes, scientific research has shown that the active ingredients in the BEYOND™ Teeth Whitening Gel are effective and safe for cosmetic tooth whitening. The dental community has used these ingredients in performing teeth whitening for years. The BEYOND™ Teeth Whitening Gel does not change or damage the structure of the teeth; it merely makes them appear white and shiny.

How long does the treatment take?

After undergoing whitening with the BEYOND™ Teeth Whitening System, teeth shades can brighten between five to 14 shades, with an average improvement of eight shades on the BEYOND™ Teeth Whitening Shade Guide. Although individual results will depend on how discolored the teeth were originally, the end result will be white, shiny teeth.

What is the difference between BEYOND™ Teeth Whitening and other methods of tooth whitening?

Although BEYOND™ Teeth Whitening uses the same cold-light power whitening technology seen in professional dental offices, it has been specially adapted for the cosmetic beauty industry. Designed with the comfort and safety of the client in mind, our 60 minute treatment is safer, gentler, and produces superior results to other teeth whitening options.

Will it hurt?

Most clients experience no pain or sensitivity during or after the treatment. A very small percentage of clients may feel some minor tooth sensitivity, especially if they consume very cold or hot foods or drinks within a few hours after the treatment. Therefore it is recommended that clients avoid consuming extremely hot or cold food or beverages for the first 24 hours following the treatment.

What is the difference between BEYOND™ Teeth Whitening and tooth whitening performed in the dental office?

The BEYOND™ Teeth Whitening System uses the same technology as is used in dental offices for power whitening, and the results are comparable. The procedure has been simplified such that trained aesthetic professionals can now safely perform the whitening procedure.
